

TactileDoodle

TactileDoodle™

Draw, Play, and Create – *Your Way!*

The TactileDoodle is a no-frills, low-tech drawing board used to quickly and independently generate tactile, raised-line graphics, to convey a variety of concepts or art within the classroom and at home, including:

- Demonstrate a variety of concepts related to science, math, geography, etc.
- Illustrate spatial concepts and simple maps.
- Practice handwriting skills.
- Play interactive games, like tic-tac-toe.
- Accommodate more open-ended, artistic drawing activities.
- Practice tracing skills within a stencil or around a 3D object.
- Provide tactile illustrations during teachable moments.

Features

- Use accompanying stylus, or ballpoint pen, to draw contrasting white lines against a black pad
- Sturdy drawing platform with a non-skid underside

Includes

- TactileDoodle board
- One package of Tactile Drawing Film, 25 sheets (Catalog No. 1-08858-00)
- One single-tip drawing stylus
- Guidebook (print and braille)
