Which one is for me?	Ideal for students learning traditional computer keyboarding skills. A great tool for students from elementary school through advanced education, and into employment. Number of internal applications and connectivity options can grow with the user as they progress. Creates transitional skills to the workplace while having the 6-key entry feature available if the user wants to type in braille directly. Compatible with PCs, Macs, and mobile devices.	Ideal for students of all ages from elementary to higher education. Its internal note taker application provides a great platform for both reading braille and writing braille. Its connection to online libraries creates many opportunities to practice reading. Chameleon provides 20 cells of braille in a portable and comfortable size to carry from class to class, or to use as an efficiency accessory with modern mobile devices.	Serves as a great braille tool for the reader on the go. With 14 braille cells, its compact size is perfect for carrying in your pocket or purse. Unique Sync feature enables users to type a note anywhere and ensure that note is synchronized with their mobile device for later use- a great feature for older students or professionals. Includes a one-handed mode to ensure more people can use this display to read and type braille.
