

Accessibility Starts With You

AMERICAN
PRINTING
HOUSE FOR
THE BLIND

The future belongs to everyone. Accessibility is a right, and we can help you break down barriers.

Americans with vision loss – approximately 23 million – are your employees and customers. We can help you create an accessible and ADA-compliant experience for them with our custom media services. **Welcome everyone!**

Braille

Braille is essential for effective, inclusive communication. From business cards to menus and other documents, we can emboss it all.

Accessible Tests

We work with publishers to help create tests and assessment tools for use by people with vision loss. Whether it's adapting a test to large print, creating braille-ready files for screen readers, or one of our other services – we will help you break down education barriers.

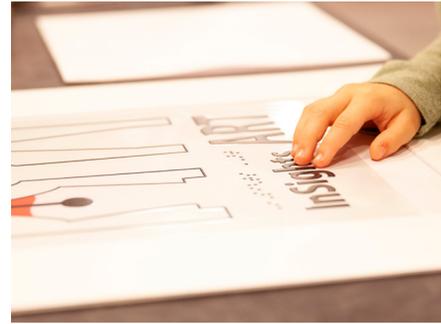

Accessible Audio

Our dedicated staff of experienced producers, professional voice talent, and researchers have been producing top-notch talking books for nearly 100 years. We create accurate and compelling audio adaptations of documents and books, and accessible descriptive audio captioning for videos.

Tactile Graphics

As a building block of accessibility, tactile graphics – or graphics you can feel – play an integral role in the experience of people with visual impairments. Search our [Tactile Graphics Image Library](#) (TGIL), or work with us to create custom graphics.

Large Print

Make sure your materials can be read by people with vision loss. We wrote the guidelines for large print readability – put our expertise to work.

Accessible Indoor Wayfinding

Your public building and spaces can be made accessible for visitors who are blind and visually impaired with our partner, [GoodMaps](#). GoodMaps is improving the accessibility and safety of indoor spaces across the globe with their state-of-the-art, innovative mapping technology.

APH Welcomes Everyone

Our Accessibility, Belonging, Inclusion, Diversity, and Equity (ABIDE) department provides customized trainings that will help your organization do the same! Our trainings highlight intersectional identities and help attendees develop empathy and an understanding that we have more commonalities than differences, all of which create a rich tapestry of perspectives. Past topics have included universal design, web and social media accessibility, inclusive language, and blindness 101. And, we have the expertise to address many additional topics. Please contact us to discuss your needs, abide@aph.org.
