

The Joy Player

Easy-to-load, switch-activated music player makes listening to MP3 and WAV files accessible.

The Joy Player allows individuals with visual and multiple impairments to access music and audio books. It is designed to use with the personal music player routine in APH's Sensory Learning Kit (SLK). This music player is designed to accommodate individuals who are developing fine motor skills, have limited mobility, or cognitive disability in addition to a visual impairment.

The Joy Player plays audio from three different types of portable electronic storage devices: SD card, USB flash drive, and Digital Talking Book (DTB) Cartridge.

Includes

- Hook and Loop strap, 65 inches
- Bag of black caps and rings
- Recharger
- USB cable
- DTB cartridges
- Braille note on downloadable instructions
- Instruction book (large print)

Note: The Joy Player does not play pre-recorded books on DTB Cartridges from the National Library Service (NLS) because NLS uses 3GS files, not WAV or MP3 files.

Recommended ages: 3 years and up.
