Juno

Juno™

Magnify on-the-go with this powerful, 7-inch LCD touchscreen handheld video magnifier with Optical Character Recognition (OCR).

Designed to accommodate the needs of students and adults with low vision, [Juno](#) is a great magnifying solution for use during work and recreational activities. Juno can capture and process multiple pages of printed text using OCR. Users can either read the text on Juno's 7-inch LCD screen, or have it read aloud to them using text-to-speech (TTS).

Features and Benefits

- 2x-30x magnification and 24 high-contrast color modes
- 180-degree rotating barrel camera supports four camera modes: self-view, reading-view, distance-view, writing/hobby-view
- Supports multiple languages, including English, French, Spanish, German, or Chinese
- File storage and transfer
- Line and mask, and Zones features
- “Exam Mode” with ability to lock certain features during exams
- Much more!

Includes

- Juno magnifier
- Padded carrying case with strap
- Power supply
- HDMI and USB cables (for use with the power supply or computer)
- Quick Start Guide and User Guide
- Screen cleaning cloth

WHAT OUR FIELD TESTERS HAD TO SAY:

“This is probably the most feature-rich handheld magnifier I have ever seen. The quality of the near magnification is very good, which in my opinion, is the most important function of this device. I really appreciate the different modes available, and I found the OCR to be very accurate, even on older scanned PDFs, which is very important in a school setting.”

“Very portable; quick on and off in standby mode; talking menus were helpful. I also like that it was very similar to using a tablet with a touch screen. I think the reading lines are a great option to help with tracking and keeping your place. Also, the reading options were nice for different views to display text.”

“[I] liked the tactile dot on buttons, the sound, the double press to select, the tutorial in the User Guide, and the announced color settings.”

“All the features worked well. I like how it will speak the buttons for new users; that could save the trainer LOTS of hassle with teaching clients.”

“Very portable and easy to use out of the box for the most basic features.”
